

ALASKA DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT (ADOL) EDI CLAIMS RELEASE 3.1 INFORMATION SESSION

For Claim Administrators, Insurance
Companies, Third Party Administrators, Self
Insured Employers & EDI Service Providers

Introduction of Presenters

Alaska Department of Labor and Workforce Development

Alexis Hildebrand	Administrative Officer
Velma Thomas	Program Coordinator
Michael Christenson	Project Assistant
Ted Burkhart	Workers' Compensation Officer

ISO

Robbie Tanner	Senior Manager – IAIABC Products Group
Linda Yon	wcCapture Product Manager
Natalie Benavides, WCP	wcCapture Assistant Product Manager
Kevin Wagner	wcCapture Business Analyst

Welcome to the ADOL EDI Claims Release 3.1 Information Session

After reviewing this video, questions should be sent in an email to ADOLEDI@ISO.COM with “Info Session Question” in the subject line.

QUESTIONS

Transitioning from Release 3 to Release 3.1

Since Alaska has been receiving EDI Release 3 FROI's and SROI's since 2013, we are not going to focus this training on what is in each of the R3.1 requirement tables, as we feel certain you are very familiar with those.

Today we would like to focus on what will be different in R3.1 from what is currently required in Release 3, and where to find important information and resources for Release 3.1.

IAIABC EDI Release 3.1 Resources

To access IAIABC EDI Claims Release 3.1 Guide:

<https://www.iaiaabc.org> and select EDI Standards and EDI Claims

The screenshot shows the IAIABC website interface. At the top left is the IAIABC logo with the tagline "Find Information. Connect People." To the right of the logo is a navigation menu with the following items: "Join", "Events & Education", "Resources", "Connect", "Committees", "EDI Standards", and "About". A red arrow points from the "Committees" item to the "EDI Standards" item. A second red arrow points from the "EDI Standards" item to a dropdown menu that is open. The dropdown menu contains the following items: "EDI Claims", "EDI Medical", "EDI Proof Of Coverage", "Electronic Medical Billing", "Standard References", "Standards Governance", "EDI Jurisdiction-Only Calls", and "Licensing". Below the navigation menu is a large banner image of a person sitting at a desk with a laptop. The laptop screen shows a virtual meeting with three participants. To the left of the person is a green plant. In the top left corner of the banner area, there is a "NEWS" section with a "READ MORE" button. The main headline of the banner reads "The IAIABC Forum 2021 To Be Held Virtually".

IAIABC EDI CLAIMS STANDARDS

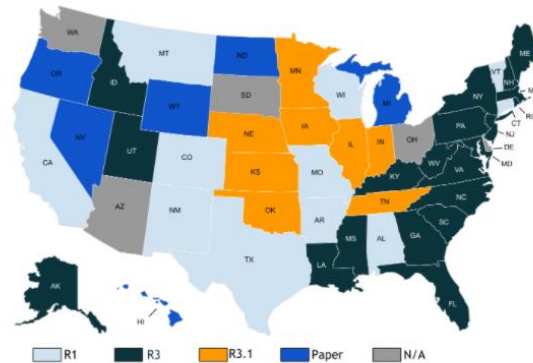

To access IAIABC EDI Claims Release 3.1 Guide:

<https://www.iaiaabc.org/edi-claims>

Below the State Implementation Map are the Claims Release 3.1 Standard Documents

Claims State Implementation

Download the EDI Jurisdictional Profiles (Members) and EDI Jurisdictional Summary (Public) for implementation insights on all IAIABC EDI Standards.

View the Claims Release 3.1 Implementation Schedule and Jurisdictional Notice to Adopt forms.

EDI Claims Release 3.1 Standard Documents

Publication Date: January 1, 2021

Standard documents include:

- Implementation Guide
- Business Scenarios
- Event Table
- Element Requirement Table
- Edit Matrix
- IAIABC XML Schema (new)
- IAIABC XML Flat File Mapping Document (new)
- IAIABC XML User Guide (new)
- IAIABC XML Sample Files (new)
- IAIABC to ACORD XML Comparison (new)
- EDI Claims Release 3.1 XML Transactions ACORD Companion Guide (no longer supported)

Registration Instructions

Welcome to the Alaska Department of Labor and Workforce Development (ADOL) Electronic Data Interchange Website

The State of Alaska Division of Workers' Compensation implemented electronic reporting of workers' compensation claim data on 7/22/2013. Claims reporting includes the first reports of injury (FROI) and subsequent reports of injury (SROI), commonly referred to as compensation reports. All Workers Compensation Claim reporting is submitted via Electronic Data Interchange (EDI) transactions through approved, registered EDI Senders or by paper submissions to Alaska Department of Labor on behalf of approved trading partners.

Currently, Alaska utilizes Claims Release 3.0 reporting standards adopted by the International Association of Industrial Accident Boards and Commissions (IAIABC). Additional information concerning EDI standards can be found online at the IAIABC website, <https://www.iaabc.org>.

If you have any questions or concerns regarding implementation of EDI FROI/SROI reporting in Alaska, please contact the ADOL EDI Support Team at adoledi@iso.com.

Any Insurer, Self-Insurer, Employer, Claim Administrator, or Vender who wishes to become a certified ADOL EDI Sender (Trading Partner) of the state may register by completing the electronic registration form located in the left navigation bar.

- Completion of the Electronic EDI Registration form provides necessary information to establish trading partners in our tables. Please note that it is important to keep all

EDI Requirements

EDI Claims Release 3.1

Version 1.2 - Revision Date: 1/19/2021, Effective Date: 5/17/2021

Download the Requirements by clicking on the links below.

The Requirements are housed in three tables:

Event Table

This table relates EDI information to the circumstances under which they are initiated as well as the timeframes for sending the information.

Element Requirements

This table lists the individual data element requirements

Edit Matrix

This table provides information on the edits that will apply to each data element and the edits that will be applied based on the population of the data element.

FROI SROI Sequencing Table

This table provides information on the Jurisdiction's MTC sequencing. It is meant to convey to the Trading Partner the sequencing rules that clarify how the Jurisdiction will apply Edit 063 - Invalid Event Sequence. This information does not supersede or replace the sequencing stipulated in the Edit Matrix.

ADOL Release 3.1 Implementation Timeline

Alaska Release 3.1 Implementation Timeline

ADOL will be transitioning from Release 3.0 (R3.0) to Release 3.1 (R3.1) for the electronic reporting of First Reports of Injury (FROI) and Subsequent Reports of Injury (SROI)

Effective May 17, 2021, use of the R3.1 standard will be mandatory for all ADOL trading partners

Alaska Release 3.1 Implementation Timeline

Sunday, May 16, 2021 is the last day that **R3.0** data will be accepted by ADOL.

All R3.0 reports not received by ADOL on **Sunday, May 16, 2021** by 11:59 PM EDT and accepted must be submitted to ISO electronically per the Event Table effective on the mandate date May 17, 2021.

Effective Monday, May 17, 2021,
electronic reporting via Release 3.1
will begin for all Trading Partners.

Alaska Release 3.1 Implementation Timeline

Trading Partner/EDI Vendor Testing: Available 2/8/2021

Release 3.1 Testing is to be completed by: 5/10/2021

Last Submission of Release 3.0: must be received by
Alaska no later than 5/16/2021 by 11:59 PM ET.

Release 3.1 FROI SROI Reporting begins: 5/17/2021

Release 3.1 Acknowledgements are returned no later
than: 5/27/2021

A decorative graphic consisting of several overlapping, wavy blue lines that flow from the top left towards the bottom right, creating a sense of movement and transition. The lines are in various shades of blue, from light to dark, and have a slight transparency, allowing them to overlap and create a layered effect.

Transitioning from R3.0 to R3.1

Transitioning from R3.0 to R3.1

Report New Claims: Claims that are new and have never been reported in Release 3 to Alaska

What EDI reports should be sent for New Claims?

FROI: For each new claim, review the FROI Event Table to determine which event would cause you to report the claim to Alaska.

SROI: Following the FROI report, review the SROI Event Table to determine what SROI reports can follow the FROI and should be reported to Alaska.

Transitioning from R3.0 to R3.1

Reporting on existing Claims:

Alaska is expecting the next MTC due on a claim as of May 17, 2021 to be reported in the R3.1 format. They do not require or accept a FROI or SROI UR – Update Report as the first R3.1 filing in R3.1

Legacy Claims: For the purposes of requirements and editing, a Legacy claim is any claim previously reported in Release 3.0 for which a Jurisdiction Claim Number (JCN) has been assigned; however, no FROI or SROI UR will be required, unless the claim meets the requirements of a “Grandfathered UR-Upon Request” as noted in the Event Table. These claims will have a JCN < 201320000.

Transitioning from R3.0 to R3.1

Legacy Claims Reporting Summary:

- If you have an open and active claim currently in Release 3.0, continue the reporting with the next required event in Release 3.1.
- Alaska will not be using the new FROI UR (Update Report) to migrate to R3.1.
- Simply continue with the next applicable event for your open and active claims, however in EDI Claims R3.1.
- New claims starting on 5/17/2021 are to be filed using MTC, Data Elements and requirements in accordance with the EDI Claims R3.1 standard and Alaska's requirement tables.

Trading Partner and EDI Vendor Testing

Trading Partner and EDI Vendor Testing

Trading Partner and EDI Vendor Testing begins 2/8/2021.

Testing for Alaska will be handled by Alaska's EDI Claims vendor, Verisk/ISO.

For Trading Partners who are currently, or are planning to file EDI Claims Release 3.1 FROI/SROI reports through an EDI vendor, the vendor will be required to complete the test plan on behalf of their clients.

Once the vendor is approved for production, the Trading Partner will also be approved for production.

Trading Partner and EDI Vendor Testing

For Trading Partners who are planning to file Release 3.1 FROI/SROI reports directly with Verisk/ISO without using an EDI Vendor, will be required to complete the test plan on their own behalf.

Alaska - ISO Jurisdiction Web Entry users are not required to test.

Trading Partner and EDI Vendor Testing

How to being testing?

Begin by downloading the ADOL R3.1 Test Requirements and Testing Feedback Request List found at their EDI Website.

Trading Partner and EDI Vendor Testing

The 5 Test Stages of Testing

Stage 1: EDI Trading Partner Profile Electronic Registration

Stage 2: Pretest and Technical Capability Test

Stage 3: Business Content Test (FROI)

Stage 4: Business Content Test (SROI)

Stage 5: Alaska Test Completion (FROI and SROI)

Trading Partner and EDI Vendor Testing

The 5 Test Stages of Testing

Stage 1: EDI Trading Partner Profile Electronic Registration

Ensure you have an existing EDI Trading Partner Profile Electronic Registration. Please note that the information on the registration is used for both testing and production reporting.

Stage 2: Pretest and Technical Capability Test

Complete the technical capability test to ensure that the file structure is valid per the IAIABC EDI Claims Release 3.1 standards. This portion ensures that the Header Record is populated with the correct Sender ID, the Receiver ID and other data validations. The file structure/format for the test files must be correct.

Trading Partner and EDI Vendor Testing

Stage 3: Business Content Test (FROI)

The business content test for FROI requires at a minimum the FROI MTCs, **(00 01 02)** to be tested in accordance with Alaska's R3.1 Test Plan.

Please note that part of the FROI test will include a requirement to submit two (2) non initiating FROI's for an existing legacy claim filed with AK prior to 2-8-2021 (MTC 01 Cancel and 02 Change). Any production data filed after 2-7-2021 will not be available in the test system for testing.

This will test your ability to file the next FROI Event on a R3 claim (Legacy) in the R3.1 format. (e.g. FROI 02 to Update Match Data to change spelling of a name and a FROI 01 Cancel).

When considering the FROI reports that will be tested, it is recommended that a review of Stage 4 SROI testing be performed at the same time to determine if additional FROI test reports are needed to establish claims in order to successfully complete the SROI testing.

Trading Partner and EDI Vendor Testing

Stage 3: Business Content Test (FROI) con't

Upon completion of Test FROI Batches 1 and 2, the Trading Partner and/or their EDI Vendor should request testing approval by completing and submitting the **Alaska EDI Testing Feedback Request List R3.1**.

The Feedback Request List will list all the completed FROI test claims required by Alaska's Test Plan, and should be sent to Alaska's EDI email.

Alaska will then notify the Trading Partner by email if the Trading Partner has passed the FROI testing and is approved to proceed with SROI testing.

Trading Partner and EDI Vendor Testing

Stage 4: Business Content Test (SROI)

The business content test for SROI requires at a minimum the SROI MTCs **(02 CA CB CD EP ER IP FN NT PY RB SX)** to be tested in accordance with the Alaska R3.1 Test Plan.

Please note that part of the SROI test will include a requirement to submit ten (10) SROI's for any MTC filed with AK prior to 2-8-2021. Any production data filed after 2-7-2021 will not be available in the test system for testing. This will test your ability to file the next Event on a R3 (Legacy) claim in the R3.1 format.

Because the SROI testing builds on the accepted FROIs, ensure that there is an adequate number of FROIs reported in Stage 3 to meet the SROI testing needs in Stage 4. For SROI reporting, please pay special attention to sequencing.

FROI and SROI testing should be completed by May 10, 2021.

Trading Partner and EDI Vendor Testing

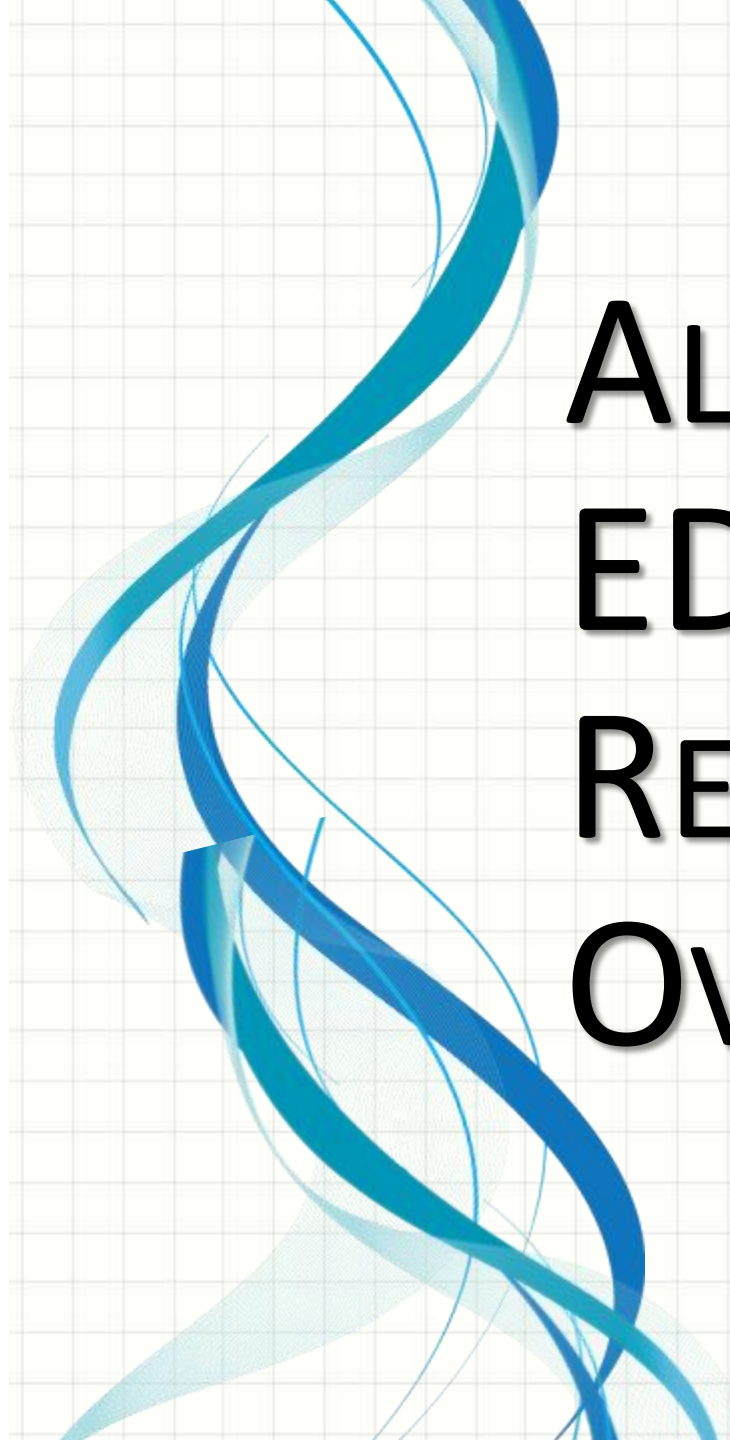

Stage 5: Test Completion (FROI and SROI)

Upon completion of the SROI minimum test transactions, the Trading Partner and/or their EDI Vendor must request testing review and approval from Alaska/ISO by submitting the **Alaska EDI Testing Feedback Request List R3.1** to Alaska's EDI email.

Stage 5 is requesting and being approved for SROI's which will mean you are approved for Production, for FROI and SROI reporting, effective May 17, 2021.

Test/Production Indicator:

The Test/Production Indicator on the Header Record will need to change from T (Test) to P (Production) to indicate that the records contained in the file are production data. Trading Partner Profiles must be kept up-to-date.

ALASKA'S EDI R3.1 REQUIREMENTS OVERVIEW

EDI Claim Requirements Overview

Trading Partners should have an understanding of the changes in the R3.1 format and Alaska's requirements:

- What EDI reports should be filed and when?
- What data is needed on the EDI reports?
- What edits will be applied to the EDI data?
- What sequencing will be applied to the EDI MTC's

EDI Claim Requirements Overview

As we noted previously, all of Alaska's Requirement Tables can be found under the EDI Requirements link on Alaska's EDI Home page.

EDI Requirements

EDI Claims Release 3.1

Version 1.2 - Revision Date: 1/19/2021, Effective Date: 5/17/2021

Download the Requirements by clicking on the links below.

The Requirements are housed in three tables:

-  **Event Table**
This table relates EDI information to the circumstances under which they are initiated as well as the timeframes for sending the information.
-  **Element Requirements**
This table lists the individual data element requirements
-  **Edit Matrix**
This table provides information on the edits that will apply to each data element and the edits that will be applied based on the population of the data element.
-  **FROI SROI Sequencing Table**
This table provides information on the Jurisdiction's MTC sequencing. It is meant to convey to the Trading Partner the sequencing rules that clarify how the Jurisdiction will apply Edit 063 - Invalid Event Sequence. This information does not supersede or replace the sequencing stipulated in the Edit Matrix.

A decorative graphic on the left side of the slide, consisting of several overlapping, wavy, ribbon-like shapes in various shades of blue, ranging from light sky blue to a darker, more vibrant blue. The shapes flow from the top left towards the bottom right, creating a sense of movement and depth.

Alaska's EVENT TABLE

Alaska Event Table:

- Comprised of:
 - Alaska Event Table Change Log
 - FROI Event Table
 - SROI Event Table
 - SROI Periodic Event Table
- Defines the circumstances under which the claim information must be sent
- Sets the timeframes for sending the information
- Based on legislative mandates

Alaska Event Table:

- The Event Table tells you the MTC and its Description; and it is required from the R3.1 mandate date of May 17 2021.
- It also identifies the Alaska FROI Report Trigger Criteria which indicates the circumstances under which a FROI report should be sent.
- It also indicates when the MTC should be triggered and when the report is due (which means when it must receive a TA – Transaction Accepted).
- If it is required by AK Statute or Rules, they will be listed in the next columns, along with what paper forms may be due to be sent, and the parties that should receive a paper form copy.

Release	Report Type	Maintenance Type		Event Rule			Report Trigger		When is the Report Due?			Statute	Paper Form(s)	Receiver
		Code	Description	Criteria	From	Thru	Criteria	Trigger Value	Value	Due Type	From			
3.1	FROI	00	Original	2 = EDI Mandate Date	5-17-2021		A, M = New Claim: All new claims including notification only, medical only and time loss.	FROI must be accepted no later than 10 calendar days after Date Employer Had Knowledge of Injury. A FROI 04 is no longer required/accepted by AK. If a claim is being denied in its entirety, it should be reported as a FROI 00, and the denial information should be sent via Form 6105.	10 days	C	C = After Date Employer Had Knowledge of Injury	AS 23.30.070	If Denial: 6105	All parties to a claim, in addition to ADOL

Alaska Event Table Changes:

What changes will you see in the Event Table with Release 3.1?

- Alaska is no longer accepting/requiring FROI CO or 04 and SROI CO, 04 or PD

Per the FROI 00 entry in the Event Table noted below, if a claim is being denied in its entirety, **it should be reported as a FROI 00**, and the denial information should be sent via Form 6105.

Release	Report Type	Maintenance Type		Event Rule			Report Trigger		When is the Report Due?			Statute	Paper Form(s)	Receiver
		Code	Description	Criteria	From	Thru	Criteria	Trigger Value	Value	Due Type	From			
3.1	FROI	00	Original	2 = EDI Mandate Date	5-17-2021		A , M = New Claim: All new claims including notification only, medical only and time loss.	FROI must be accepted no later than 10 calendar days after Date Employer Had Knowledge of Injury. A FROI 04 is no longer required/accepted by AK. If a claim is being denied in its entirety, it should be reported as a FROI 00, and the denial information should be sent via Form 6105.	10 days	C	C = After Date Employer Had Knowledge of Injury	AS 23.30.070	If Denial: 6105	All parties to a claim, in addition to ADOL

Alaska Event Table Changes:

What changes will you see in the Event Table with Release 3.1?

Per the FROI SX entry in the Event Table noted below,
 If ongoing benefits are being terminated due to a full or partial denial, a SROI SX should be sent with Suspension Reason Code-Full S1 - SJ. The denial information should be sent via Form 6105.

Release	Report Type	Maintenance Type		Suspension	Event Rule		Report Trigger		When is the Report Due?			Statute	Paper Form(s)	Receiver
		SX	SX - Full Suspension		2 = EDI Mandate Date	5-17-2021	M = MTC Defined	Full Suspension – All payment(s) of indemnity benefits have stopped. If ongoing benefits are being terminated due to a full or partial denial, a SROI SX should be sent with Suspension Reason Code-Full - SJ. The denial information should be sent via Form 6105.	28 Days	C	J - From when Last Payment of Compensation was issued			
3.1	SROI	SX	SX - Full Suspension	All	2 = EDI Mandate Date	5-17-2021	M = MTC Defined	Full Suspension – All payment(s) of indemnity benefits have stopped. If ongoing benefits are being terminated due to a full or partial denial, a SROI SX should be sent with Suspension Reason Code-Full - SJ. The denial information should be sent via Form 6105.	28 Days	C	J - From when Last Payment of Compensation was issued	AS 23.30.155	If a Denial Form 6105.	All parties to a claim, in addition to ADOL

Alaska Event Table Changes:

What changes will you see in the Event Table with Release 3.1?

- The only FROI UR that will be accepted is if the JCN is < 201320000. No FROI UR is needed to begin R3.1 reporting.
- Changes to SROI MTC's include CA's for the reporting of Reduced Earning for Temporary Partial (Benefit Type Code 070). Note that Alaska doesn't require the a CA when the Gross Weekly Amount changes because of application of the employee's current weekly wages while receiving Temporary Partial benefits (Benefit Type Code 070); however, if sent, it will not be rejected.
- Please see ADOL R3.1 Implementation Guide for when the Reduced Earnings segment should be reported. ADOL will only require a Claim Administrator to report that Reduced Earnings have been initiated (BTC 070 Temporary Partial Benefits) via MTC AP/IP/CB/RB, and when Temporary Partial Benefits have been stopped CB/SX.

Alaska Event Table Changes:

- Alaska will accept the new MTC NT for Narrative.
- Suspensions are reported in R3.1 as MTC SX. The former S1-SJ Suspension MTC's are now sent in DN0418 Suspension Reason Code – Full field in R3.1
- Changes triggered via MTC 02 must follow the Trigger Value rules of the Event Table and should only be triggered in accordance with the Reportable Change Codes on the Element Requirement Table.

Alaska wants a FROI or SROI 02 is to be sent for any changes to the claim for 5 years from last accepted FN.

- If the SROI MTC is not present on the Event Table, then Alaska is not accepting that MTC in R3.1.

Alaska's ELEMENT REQUIREMENT

Element Requirement Table

What data is needed on the EDI reports?

The Element Requirement Table lists every data element on the FROI and SROI, and Alaska has indicated if that data element is required on a specific MTC report.

If a data element is conditionally required (MC), the FROI and SROI Conditions tab further clarifies under what conditions that data element is required.

Element Requirement Table

The Element Requirement Table contains 10 worksheets:

- Alaska Change Log
- FROI Element Requirements
- FROI 02 Exceptions
- FROI Conditions
- Legacy Claim Definition
- SROI Element Requirements
- SROI 02 Exceptions
- SROI Conditions
- Event Benefit Segment Requirements
- Event Benefit Conditions

Element Requirement Table

Prior to the 10 worksheets is an Instructions Tab. This Tab provides a legend that defines the color and codes in each requirement cell and the Application Acknowledgement Code results.

Legend for Requirement Code (Description) = resulting Application Acknowledgment Code	
Requirement Code	Result of Failed Element Requirement Edit
F (Fatal)	TR (Transaction Rejected)
M (Mandatory)	TR (Transaction Rejected)
MC (Mandatory/Conditional)	TR (Transaction Rejected)
E (Expected)	TE (Transaction Accepted with Errors)
EC (Expected/Conditional)	TE (Transaction Accepted with Errors)
AA (If Applicable/Available Transaction Accepted)	TA (Transaction Accepted)
AE (If Applicable/Available Transaction Accepted with Errors)	TE (Transaction Accepted with Errors)
AR (If Applicable/Available Transaction Rejected)	TR (Transaction Rejected)
NA (Not Applicable)	TA (No error messages may be applied)
X (Exclude)	TA (No error messages may be applied)
For Benefit Segment Data Element Requirement Table	
R (Restricted)	TR (Transaction Rejected)
RC (Restricted/Conditional)	TR (Transaction Rejected)

It also defines the colors and Reportable Change Codes in the 02 columns, which is new for R3.1 This will be discussed further below in the presentation.

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

Below is the FROI Variable Segment excerpt from the FROI Element Requirements tab:

On FROI, SROI, Both	REC	DN#	DATA ELEMENT NAME	FORMAT	00	01	02				AQ	AU	UR - Upon Request (grandfathered)	
							Reportable Change							
					Match Data		02 Requirement Code	A (Add)	U (Update)	D (Delete)	R (Remove)		Grandfathered UR accepted. ADOL will not do UR- Update Report for R3.1.	
Variable Segments														
Accident/Injury Description Narratives

FROI	R21	0402	Cancel Reason Narrative	150 A/N	X	M	X	B	B	B	B	X	X	X

As we noted earlier, Alaska will **not** be taking the FROI CO and will also not be taking the FROI 04 Denial.

You will not find a column for CO or 04 and you can see that the requirement codes for corresponding Denial data elements is NA.

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

Part of Body Injured Code is now in a variable segment

Alaska will also using the new Cancel Elements variable segment for MTC 01 – Cancel Entire Claim, and the new data elements, **Cancel Reason Code; Jurisdiction Claim Number – Related** (as defined under the FROI Conditions tab); and **Cancel Reason Narrative.**

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

Return to Work Changes

In Release 3 you have the following:

DN0068 – Initial Return to Work Date

DN0078 - Latest Return to Work Status Date

And to go with those dates you have 1 set of what we refer to as the Return To Work Qualifiers (below). You send the qualifiers to match the most recent Return to Work Date reported (either DN0068 or DN0072)

DN0189 - Return to Work Type Code

DN0224 - Physical Restrictions Indicator

DN0228 - Return to Work with Same Employer Indicator

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

Return to Work Changes

In Release 3.1 you still have:

DN0068 – Initial Return to Work Date

DN0078 - Latest Return to Work Status Date

However, you now have new DN's for the RTW Qualifiers and there is a set that goes with Initial RTW and one with Latest RTW.

You will need to determine how to convert these properly when transitioning to R3.1.

DN0403 - Initial RTW Type Code

DN0404 - Initial RTW Physical Restrictions Indicator

DN0405 - Initial RTW With Same Employer Indicator

DN0406 - Latest RTW Type Code

DN0407 - Latest RTW Physical Restrictions Indicator

DN0408 - Latest RTW With Same Employer Indicator

Please remember the Initial and the Latest RTW Date should never equal each other.⁵³

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

Return to Work Changes

As you can see from Alaska's Element Requirement Table excerpt below, the Initial and Latest RTW fields are conditionally required (MC) on most MTC's.

Please review the SROI Conditions tab to determine under what conditions they are required to be present.

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

SROI Variable Segment Changes

Reduced Earnings Segment

In Release 3.1 several DN's were added to the Reduced Earnings segment to help clarify the specific week of wages that are being reported.

The following DN's were added to the Reduced Earnings segment:

DN0414 - Reduced Earnings Week Start Date

DN0415 - Reduced Earnings Week End Date

DN0435 - Reduced Earnings Net Weekly Amount Due by Claim Administrator

Please refer to the R3.1 Implementation Guide, Data Dictionary for the definitions and data population rules for these new DN's

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

SROI Variable Segment Changes

Reduced Earnings Segment

Per the SROI Event Table under MTC CA:

Alaska does not require a CA when the Gross Weekly Amount changes because of application of the employee's current weekly wages while receiving Temporary Partial benefits (Benefit Type Code 070); however, if sent, it will not be rejected.

Please see ADOL R3.1 Implementation Guide for when the Reduced Earnings segment should be reported.

Alaska will only require a Claim Administrator to report that Reduced Earnings have been initiated (BTC 070 Temporary Partial Benefits) via MTC AP/IP/CB/RB, and when Temporary Partial Benefits have been stopped CB/SX.

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

SROI Variable Segment Changes

Reduced Earnings Segment

Please review the SROI Conditions Tab to determine the Conditions under which these DN's are required.

SROI Variable Segment Changes

Dependent/Payee Relationships Segment

In Release 3:

DN0097 - Dependent/Payee Relationship Code was in a variable segment by itself in the upper A49 record of the SROI.

In Release 3.1:

DN0097 - Dependent/Payee Relationship Code

was moved to a variable segment in the bottom R22 record of the SROI AND

DN0425 - Dependent First Name

DN0426 - Dependent Last Name

DN0427 - Dependent Date of Birth

DN0428 - Dependent Gender Code

DN0429 - Dependent Extent of Dependency was added

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

SROI Variable Segment Changes

Dependent/Payee Relationships Segment

Please refer to the R3.1 Implementation Guide, Data Dictionary for the definitions and data population rules for these DN's.

One new change is that this segment can also be required on a Permanent Total Disability or a Catastrophic claim (Benefit Type Code 020, 220, 520 and 021, 221, 521). It is not exclusive to just Death claims.

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

SROI Variable Segment Changes

Dependent/Payee Relationships Segment

The SROI ERT Excerpt below shows that Alaska does not require the new DN's:

DN0428 - Dependent Gender Code

DN0429 - Dependent Extent of Dependency

On FROI, SROI, Both	REC	DN#	DATA ELEMENT NAME	FORMAT	02				AP	CA	CB	CD	EP	ER	FN	IP	NT	PY	RB	SX	Grandfathered UR Update Report	AN

Please review the SROI Conditions Tab to determine the Conditions under which the other DN's are required.

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

SROI Variable Segment Changes

Payment Segment

In Release 3:

Alaska did not require a Payment segment on MTC PY for the reporting of Lump Sum Payments or Settlements or on MTC IP, AP or RB

In Release 3.1:

Alaska will require a Payment segment on MTC PY for the reporting of Lump Sum Payments or Settlements and on MTC IP, AP and RB.

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

Benefit Type Code Changes

Event Benefits Segment Requirements Tab

On the Event Benefits Segment Requirements Tab of the ERT, Alaska identifies all Event Benefit Type Codes they will and will not accept. (Note that Benefit Type Codes for 5xx are not on this table because they are not “Event” Benefit Type Codes).

If the Event Benefit Type Code is accepted, the DN0085 Benefit Type Code column will reflect an MC. If it is not accepted, it will reflect a R – Restricted.

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

*Note: prior paid 030 benefits should be remapped to 040 for reporting in R3.1

*Note: prior paid 230 benefits can continue to be reported, but 230 can not be reported for DOI's >= 5-17-2021

* Note: Although not on this table, prior paid 530 benefits should be remapped to 540 for reporting in R3.1

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

Benefit Type Code Changes

Event Benefits Segment Requirements Tab

Alaska would especially like to point out that at the time of conversion to Release 3.1, they are converting from accepting Permanent Partial Scheduled Benefit Types (030, 230* and 530), to now accepting Permanent Partial payments under the Permanent Partial Unscheduled codes (040, and 540).

There is no Employer Paid equivalent for 040, as the 240 Benefit Type Code is for all Employer Paid Unspecified benefits.

*Alaska will allow the continued reporting of Benefit Type Code 230 (Permanent Partial Scheduled) for Dates of Injury prior to 5-17-2021 only.

030 to 040

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

Benefit Type Code Changes

Event Benefits Segment Requirements Tab

This conversion from Permanent Partial Scheduled to Permanent Partial Unscheduled is happening because NCCI requires that Permanent Partial benefits be reported to them as Unscheduled (040) and claim administrators had to remap the Permanent Partial benefits sent via EDI to Alaska for purposes of reporting to NCCI, and requested the change. Now the codes will be consistent.

For all open legacy claims that will continue to be reported in the R3.1 format, please ensure you have remapped the Permanent Partial 030 and 530 Benefits.

Alaska will allow the continued reporting of Benefit Type Code 230 (Permanent Partial Scheduled) for Dates of Injury prior to 5-17-2021 only.

As noted at the bottom of the Event Benefits Segment table, prior paid 030 benefits should be remapped to 040 for reporting in R3.1 and although 530 benefits are not noted on this table, they should be remapped to 540 for reporting in R3.1.

No Reduced Benefit Amount Code R for Reclassification will be necessary, and no SROI 02's needed to report this change.

Element Requirement Table

Changes for R3.1 that Alaska wants to draw to your attention.

Benefit Type Code Changes

Event Benefits Segment Conditions Tab

Last year, the IAIABC amended the Event Benefits Segment Conditions Tab for DN0192 Benefit Payment Issue Date to add the ability to collect Benefit Payment Issue Date on MTC CA and CB in addition to the already allowed MTC's IP, AP, PY and RB.

Alaska would like Benefit Payment Issue Date reported for all of those MTC's.

Event: <i>BENEFIT DATA ELEMENT</i>							
Req Code	MTC	DN#	DATA ELEMENT NAME	BUSINESS CONDITION(S)	TECHNICAL CONDITION(S)	EXCEPTIONS	IAIABC NOTE
MC	Refer to Event Benefit Segment Req Table legend	0192	Benefit Payment Issue Date	Required if: Number of Benefits (DN0288) is >0 and MTC = IP, AP, CA, CB, PY, RB, SX or any corresponding 02 and Benefit Payment Issue Date is permitted per the Event Ben Seq Requirement Table and Benefit Type Code (DN0085) is present and valid per Valid Value Table.	Required if: Number of Benefits (DN0288) is >0 and MTC = IP, AP, CA, CB, PY, RB, SX or any corresponding 02 and Benefit Payment Issue Date is permitted per the Event Ben Seq Requirement Table and Benefit Type Code (DN0085) is present and valid per Valid Value Table.		Must be Conditional (MC, EC) or NA (Not Applicable) based on Data Population Rules in Dictionary (Section 6).

Element Requirement Table

MTC 02 Change Process

One of the primary reasons for creating Release 3.1 was to improve the 02 Change process.

In Release 3, a state could just enter a Y in the 02 column if they wanted to know if a DN was changed. Most jurisdictions did not want to know every time a DN was updated in a Claim Administrator's system, but usually only wanted an 02 if it was initially reported wrong and is being changed.

A claim administrator's system can not determine if a change is being made because the data was wrong, or the data was just being updated.

This resulted in numerous 02's being triggered to a state, and the state was unable to tell specifically which data was being changed on the transaction.

Release 3.1 has now developed a specific 02 Change variable segment on the FROI and SROI to help resolve this.

Element Requirement Table

MTC 02 Change Process

A new 02 Change variable segment was created on both the FROI and SROI.

This segment contained new data elements created to identify the data element or segment that was being changed:

DN0412 – Change Date Element/Segment Number and

DN0413 – Change Reason Code

The new Change Reason Codes are:

A = Add

U = Update

R = Remove – Used for DN's not in a variable segment

D = Delete – Used for variable segments only, when an entire segment is being deleted.

Please refer to the R3.1 Implementation Guide, Data Dictionary for the definitions of these codes and data population rules for these DN's. Also please thoroughly review the 02 Change Processing Rules in Section 4.

Element Requirement Table

MTC 02 Change Process

These **new Change Reason Codes**:

A - Add, U – Update, R - Remove and D - Delete

now have their own columns in a special 02 set of columns on the FROI and SROI Element Requirement Table, along with an 02 Requirement Code column.

02				
	Reportable Change			
02 Requirement Code	A (Add)	U (Update)	D (Delete)	R (Remove)

Element Requirement Table

MTC 02 Change Process

The IAIABC has created Reportable Change Codes for a jurisdiction to use to identify if an 02 Add, Update, Remove or Delete will be accepted. Some of these codes also identify which report (FROI or SROI) the change should be reported on.

The legend of these codes is found in the Instructions tab at the front of the Element Requirement Table.

REPORTABLE CHANGE CODES used on Alaska's Element Requirement Table are as follows:

Reportable Change Codes: Used in MTC 02 Reportable Change columns labeled A (Add) , U, (Update), R (Remove) and D (Delete)

Note: See IAIABC Release 3.1 Guide 02 Change Processing Rules in Section 4 for the full definitions.

B: Restricted - IAIABC Defined No Change Allowed

N: No Change Allowed - Will Reject if Present

H: No Change Required - Will Not Reject if Present

K: Required Change on FROI

KG: Required Change on FROI with Exception

Y: Required Change on FROI or on SROI not both. This code only applies to Data Elements not contained on both the FROI and SROI.

YG: Required Change on FROI or on SROI not both with Exception. This code only applies to Data Elements not contained on both the FROI and SROI.

J: Required Change by Transaction Type - Change on SROI if Accepted otherwise Change on FROI

JG: Required Change by Transaction Type with Exception - Change on SROI if Accepted otherwise Change on FROI

Note: For Y, YG, J, JG, K and KG: Refer to the first column 'On FROI, SROI or Both' of the FROI Element Requirements and SROI Element Requirement Table for the indication of location of DN's. If value is not = Both then there is an indication of FROI (only on FROI) and SROI (only on SROI).

Element Requirement Table

MTC 02 Change Process

For **DN0412 – Change Date Element/Segment Number** Claim Administrators must identify the Change Data Element/Segment Number of the data that is changing.

If the data that is changing is NOT in a variable segment, you will send the DN data number for the data element that is changing.

If the data that is changing is IN a variable segment, you will send the Variable Segment Counter data number (DN). These are the “Number Of” Data elements.

Please unfreeze the panes to see Legend information above.															
On FROI, SROI, Both	REC	DN#	DATA ELEMENT NAME	FORMAT	Match Data	00	01	02					AQ	AU	UR - Upon Request (grandfathered)

Element Requirement Table

MTC 02 Change Process

A jurisdiction must identify if they want, or do not want, an 02 Change sent for each applicable Change Reason Code - Add, Update, Delete or Remove, for every data element on both the FROI and SROI. The way they express those requirements is by using the Reportable Change Codes, to identify when to send an MTC 02 Change, and on what transaction, FROI or SROI.

On FROI, SROI, Both	REC	DN#	DATA ELEMENT NAME	FORMAT	Match Data	00	01	02 Requirement Code	02 Reportable Change			
									A (Add)	U (Update)	D (Delete)	R (Remove)

Element Requirement Table

MTC 02 Change Process

Here is an example of a completed SROI Change Data variable segment from the IAIABC, with 6 changes noted. Five (5) of the data elements are being added and one (1) is being Updated. The Update is to the “Benefits” segment, so the DN number sent in the Change segment is for the Number of Benefits (DN0288).

	<i>Change Data Elements</i>		6 occurrences
0412	Change Data Element/Segment Number	0201	Anticipated Wage Loss Indicator
0413	Change Reason Code	A	Add
0412	Change Data Element/Segment Number	0068	Initial Return to Work Date
0413	Change Reason Code	A	Add
0412	Change Data Element/Segment Number	0403	Initial RTW Type Code
0413	Change Reason Code	A	Add
0412	Change Data Element/Segment Number	0404	Initial RTW Physical Restrictions Indicator
0413	Change Reason Code	A	Add
0412	Change Data Element/Segment Number	0405	Initial RTW With Same Employer
0413	Change Reason Code	A	Add
0412	Change Data Element/Segment Number	0288	Number of Benefits
0413	Change Reason Code	U	Update

FROI and SROI 02 Exceptions

Examples from Alaska's completed SROI 02 Exceptions Tab are below:

Req Code	Change Reason Code	DN#	DATA ELEMENT NAME	EXCEPTIONS	IAIABC NOTE
YG	A	0085	Benefit Type Code	<p>SROI 02 Change may be sent to report a waiting period paid for a different Benefit Type from the Benefit Type previously reported on the IP (Initial Payment), EP (Employer Paid), or AP (Acquired Payment). This will be indicated as an A (Add) in the Change Variable Segment for the Benefit Segment because a new Benefit Segment occurrence was added. A new DN0085 Benefit Type Code was added and the DN0089 Benefit Period Through Date of the new DN0085 Benefit Type Code was prior to the DN0088 Benefit Period Start Date of the Initial Payment (IP, EP or AP).</p> <p>See Edit Matrix: Population Restriction for Number of Benefits. Element Error Text: SROI02:CanAddOnlyNewDN85,checkDN85 EM_POP_REST_DN0288_01</p>	refer to Code Usage Limitations in <i>02 Change Processing Rules</i> in Section 4 of Claims Release 3.1 implementation guide
YG	A	0086	Benefit Type Amount Paid	<p>SROI 02 Change may be sent to report a waiting period paid for a different Benefit Type from the Benefit Type previously reported on the IP (Initial Payment), EP (Employer Paid), or AP (Acquired Payment). This will be indicated as an A (Add) in the Change Variable Segment for the Benefit Segment because a new Benefit Segment occurrence was added. A new DN0085 Benefit Type Code was added and the DN0089 Benefit Period Through Date of the new DN0085 Benefit Type Code was prior to the DN0088 Benefit Period Start Date of the Initial Payment (IP, EP or AP).</p> <p>See Edit Matrix: Population Restriction for Number of Benefits.</p>	refer to Code Usage Limitations in <i>02 Change Processing Rules</i> in Section 4 of Claims Release 3.1 implementation guide
YG	A	0087	Net Weekly Amount	<p>SROI 02 Change may be sent to report a waiting period paid for a different Benefit Type from the Benefit Type previously reported on the IP (Initial Payment), EP (Employer Paid), or AP (Acquired Payment). This will be indicated as an A (Add) in the Change Variable Segment for the Benefit Segment because a new Benefit Segment occurrence was added. 02 Grouped Conditions

As previously mentioned, when the MC is shaded in a light yellow, this is an indication that Alaska has changed the shading from blue to yellow for the MC, and has added a condition to the Conditions tab for MTC 02.

Alaska has grouped several DN's together for the purposes of editing the 02 Changes. These grouped data elements at the bottom of the ERT Conditions tab, identify all the DN's that are to be present on the 02 transaction, if one of them is being changed as noted in the condition.

Req Cod	MTC	DN#	DATA ELEMENT NAME	BUSINESS CONDITION(S)	TECHNICAL CONDITION(S)
MC	02	DN#	DATA ELEMENT NAME: NEW Grouping Edits for MTC 02		
MC	SROI 02 (Group 1)	0068	Initial RTW Date	Data grouping MTC 02 Change relationship edits needed: All DN's must be present on the MTC 02 transaction for Add or Update or Remove to 0068 (Initial RTW Date), 0403 (Initial RTW Type Code), 0404 (Initial RTW Physical Restrictions Indicator). Note: This edit is only applicable if it is a Non-Legacy Claim as defined in the Legacy Claim Definition Tab.	If SROI MTC (DN0002) = 02 and Change Reason Code (DN0413) = A (Add) or = U (Update) and it is a Non-Legacy Claim per the Legacy Claim Definition Tab, then 0068 (Initial RTW Date) is required to be present on the MTC 02 transaction whenever Change Data Element/Segment Number (DN0412) = 0403 (Initial RTW Type Code) or = 0404 (Initial RTW Physical Restrictions Indicator).
MC	SROI 02 (Group 1)	0404	Initial RTW Physical Restrictions Indicator	Data grouping MTC 02 Change relationship edits needed: All DN's must be present on the MTC 02 transaction for Add or Update or Remove to 0068 (Initial RTW Date), 0403 (Initial RTW Type Code), 0404 (Initial RTW Physical Restrictions Indicator). Note: This edit is only applicable if it is a Non-Legacy Claim as defined in the Legacy Claim Definition Tab.	If SROI MTC (DN0002) = 02 and Change Reason Code (DN0413) = A (Add) or = U (Update) and it is a Non-Legacy Claim as defined in the Legacy Claim Definition Tab, then 0404 (Initial RTW Physical Restrictions Indicator) is required to be present on the MTC 02 transaction whenever Change Data Element/Segment Number (DN0412) = 0403 (Initial RTW Type Code) or = 0068 (Initial RTW Date).
MC	SROI 02 (Group 1)	0403	Initial RTW Type Code	Data grouping MTC 02 Change relationship edits needed: All DN's must be present on the MTC 02 transaction for Add or Update or Remove to 0068 (Initial RTW Date), 0403 (Initial RTW Type Code), 0404 (Initial RTW Physical Restrictions Indicator). Note: This edit is only applicable if it is a Non-Legacy Claim as defined in the Legacy Claim Definition Tab.	If SROI MTC (DN0002) = 02 and Change Reason Code (DN0413) = A (Add) or = U (Update) and it is a Non-Legacy Claim as defined in the Legacy Claim Definition Tab, then DN0403 (Initial RTW Type Code) is required to be present on the MTC 02 transaction whenever Change Data Element/Segment Number (DN0412) = 0068 (Initial RTW Date) or = 0404 (Initial RTW Physical Restrictions Indicator).

02 Grouped Conditions

The example illustrates “SROI 02 Group 1” for the Initial RTW Date and the other 2 related data elements, Initial RTW Type Code, Initial RTW Physical Restrictions Indicator.

Req Cod	MTC	DN#	DATA ELEMENT NAME	BUSINESS CONDITION(S)	TECHNICAL CONDITION(S)
MC	02	DN#	DATA ELEMENT NAME: NEW Grouping Edits for MTC 02		
MC	SROI 02 (Group 1)	0068	Initial RTW Date	<p>Data grouping MTC 02 Change relationship edits needed: All DN's must be present on the MTC 02 transaction for Add or Update or Remove to 0068 (Initial RTW Date), 0403 (Initial RTW Type Code), 0404 (Initial RTW Physical Restrictions Indicator).</p> <p>Note: This edit is only applicable if it is a Non-Legacy Claim as defined in the Legacy Claim Definition Tab.</p>	<p>If SROI MTC (DN0002) = 02 and Change Reason Code (DN0413) = A (Add) or = U (Update) and it is a Non-Legacy Claim per the Legacy Claim Definition Tab, then 0068 (Initial RTW Date) is required to be present on the MTC 02 transaction whenever Change Data Element/Segment Number (DN0412) = 0403 (Initial RTW Type Code) or = 0404 (Initial RTW Physical Restrictions Indicator).</p>
MC	SROI 02 (Group 1)	0404	Initial RTW Physical Restrictions Indicator	<p>Data grouping MTC 02 Change relationship edits needed: All DN's must be present on the MTC 02 transaction for Add or Update or Remove to 0068 (Initial RTW Date), 0403 (Initial RTW Type Code), 0404 (Initial RTW Physical Restrictions Indicator).</p> <p>Note: This edit is only applicable if it is a Non-Legacy Claim as defined in the Legacy Claim Definition Tab.</p>	<p>If SROI MTC (DN0002) = 02 and Change Reason Code (DN0413) = A (Add) or = U (Update) and it is a Non-Legacy Claim as defined in the Legacy Claim Definition Tab, then 0404 (Initial RTW Physical Restrictions Indicator) is required to be present on the MTC 02 transaction whenever Change Data Element/Segment Number (DN0412) = 0403 (Initial RTW Type Code) or = 0068 (Initial RTW Date).</p>
MC	SROI 02 (Group 1)	0403	Initial RTW Type Code	<p>Data grouping MTC 02 Change relationship edits needed: All DN's must be present on the MTC 02 transaction for Add or Update or Remove to 0068 (Initial RTW Date), 0403 (Initial RTW Type Code), 0404 (Initial RTW Physical Restrictions Indicator).</p> <p>Note: This edit is only applicable if it is a Non-Legacy Claim as defined in the Legacy Claim Definition Tab.</p>	<p>If SROI MTC (DN0002) = 02 and Change Reason Code (DN0413) = A (Add) or = U (Update) and it is a Non-Legacy Claim as defined in the Legacy Claim Definition Tab, then DN0403 (Initial RTW Type Code) is required to be present on the MTC 02 transaction whenever Change Data Element/Segment Number (DN0412) = 0068 (Initial RTW Date) or = 0404 (Initial RTW Physical Restrictions Indicator).</p>

Alaska's Edit Matrix

Alaska's Edit Matrix:

The Alaska Edit Matrix defines the valid code values Alaska accepts, the Match Data that will be used to match transactions and the edits that will be applied to the EDI data.

It conveys the specific edit that will be applied to each data element and provides the standard error messages associated with these edits.

This spreadsheet is very important for understanding and correcting errors.

Tables Located in the Edit Matrix

- **Alaska Edit Matrix Change Log:** summary of all changes to Edit Matrix from one version to another
- **DN-Error Message:** “standard” editing developed for Release 3.1 data elements and Alaska specific edits
- **Value Table:** expresses acceptable code values
- **Valid Value Detail Page 1 and 2:** two tables showing another version of the value table containing the code values, definitions what Alaska accepts. This is helpful to print out for a quick reference.
- **Match Data:** describes the data elements used to determine if the report will create a new claim or find an existing claim
- **Match Data for MTC UR (Grandfathered):** describes the data elements used to determine if the UR(G) report will find an existing claim.
- **Population Restrictions:** contains any restrictions applied to the data element(s)
- **Legacy Claim Definition:** Defines a Legacy and Non-Legacy Claim as it applies to the editing.
- **Sequencing Table:** contains MTC types with the clarification of what should precede the current MTC being filed.

Troubleshooting Errors in the Edit Matrix

All Data Elements on the FROI and SROI have a 4 digit "DN" Data Number that is used to identify the data element on the Acknowledgement.

Every Error also has an Error Number. These DN Number and Error Number combinations that are present on the acknowledgment can be used to find the error in this DN Error Table or the Population Restrictions tab, which further explains more complex edits.

This is an example of the DN Error Message Tab

Sorted by Error Message & DN		Match Data	Jurisdiction will apply edits?	Population Restrictions Indicator	001	018	019	028	029	030	031	033	034
DN	IAIABC Data Element Name				Mandatory field not present	Number of Days Worked must be 0-7	Days must be 0-6	All digits must be 0-9	Must be a valid date (CCYYMMDD)	Must be A-Z, 0-9, or spaces	Must be a valid time	Must be <= Date of Injury	Must be >= Date of Injury
0000	Entire Batch		Y										
0001	Transaction Set ID		F	F									
0002	Maintenance Type Code	Y	F	P	F				L				
0003	Maintenance Type Code Date	Y	F	P	F				L				L
0004	Jurisdiction Code		F	P	F								
0005	Jurisdiction Claim Number	Y	Y	P	L								
0006	Insurer FEIN	Y	F	P	F			L					
0007	Insurer Name		Y		L								
0010	Claim Administrator Primary Address		Y		L								
0011	Claim Administrator Secondary Address		Y										
0012	Claim Administrator City		Y		L								
0013	Claim Administrator State Code		Y		L								
0014	Claim Administrator Postal Code		Y	P	L								
0015	Claim Administrator Claim Number		F	P	F								

Population Restrictions

The *Population Restriction tab* contains:

- The DN # (it is in DN # order)
- Report or MTC
- Data Element Name
- Exception
- Error Message #
- Error Message Text (IAIABC Description)
- Element Error Text (50 char description from AK)

DN	Report or MTC	Data Element Name	Population Restriction	Exception	Error Message Number	Error Message Text	Element Error Text (DN0291)
0002	SROI FN	Maintenance Type Code	If last accepted MTC = SROI IP, AP, EP, CB, RB, ER and the incoming SROI MTC FN DN0288 Number of Benefits > 00 AND DN0226 Recovery Code - 880 (Voided Indemnity Check) is NOT present then reject SROI MTC = FN	Exclude SROI 02 or SROI CO (if applicable), or periodics	063	Invalid Event Sequence	SROI SX required prior to FN
0003	FROI & SROI	Maintenance Type Code Date	Must be greater than or equal to Trading Partners EDI Implementation Date (20210517)	Do not run this edit on Test claims where	111	Must be valid content	Must be greater than or equal to EDI Imp Date
0003	FROI & SROI	Maintenance Type Code Date	MTC Dates must be no more than 7 days prior to Date Transmission Sent.		064	Invalid data relationship	MTC Date cant b more than 7 dys prior to Date Sent
0003	FROI & SROI	Maintenance Type Code Date	MTC Date must be greater than or equal to MTC Date of last MTC Report that is in TA or TE acknowledgment status.	Do Not apply edit if: Sender ID = (ADOL Sender ID) Master FEIN:	064	Invalid data relationship	Must be >= last MTC Date in T/TE ack
0003	SROI AN	Maintenance Type Code Date	DN0003 (Maintenance Type Code Date) must not be reported as the same year as the Date of Injury.		064	Invalid data relationship	MTC Date must not = same year as DOI
0004	FROI & SROI	Jurisdiction Code	Value must be "AK"		111	Must be valid content	Value must be equal to "AK"
0005	FROI & SROI	Jurisdiction Claim Number	Must be the same number assigned by ADOL when the claim was established. See Match Data Processing Note for additional information.		117	Match data value not consistent with value previously reported	Match Data - JCN must be same as assigned JCN
0006	FROI 02	Insurer FEIN	Multiple match data value can be changed in one transaction. See Match Data Table and exception under 'Category 4'.		117	Match data value not consistent with value previously reported	3 match DN's can change; exception in Category 4

Troubleshooting Errors in the Edit Matrix

The Acknowledgement should provide you with the following information to help you resolve errors:

Element Number (DN)

Element Error Number

Variable Segment Number

Element Error Text

In this example the acknowledgement showed the following:

Element Number (DN): **0003 (MTC Date)**

Element Error Number: **064 (Invalid Data Relationship)**

Variable Segment Number: **00 (not in a variable segment)**

Element Error Text: **MTC Date cant b more than 7 dys prior to Date Sent**

DN	Report or MTC	Data Element Name	Population Restriction	Exception	Error Message Number	Error Message Text	Element Error Text (DN0291)
0003	FROI & SROI	Maintenance Type Code Date	MTC Dates must be no more than 7 days prior to Date Transmission Sent.		064	Invalid data relationship	MTC Date cant b more than 7 dys prior to Date Sent

Troubleshooting Errors in the Edit Matrix

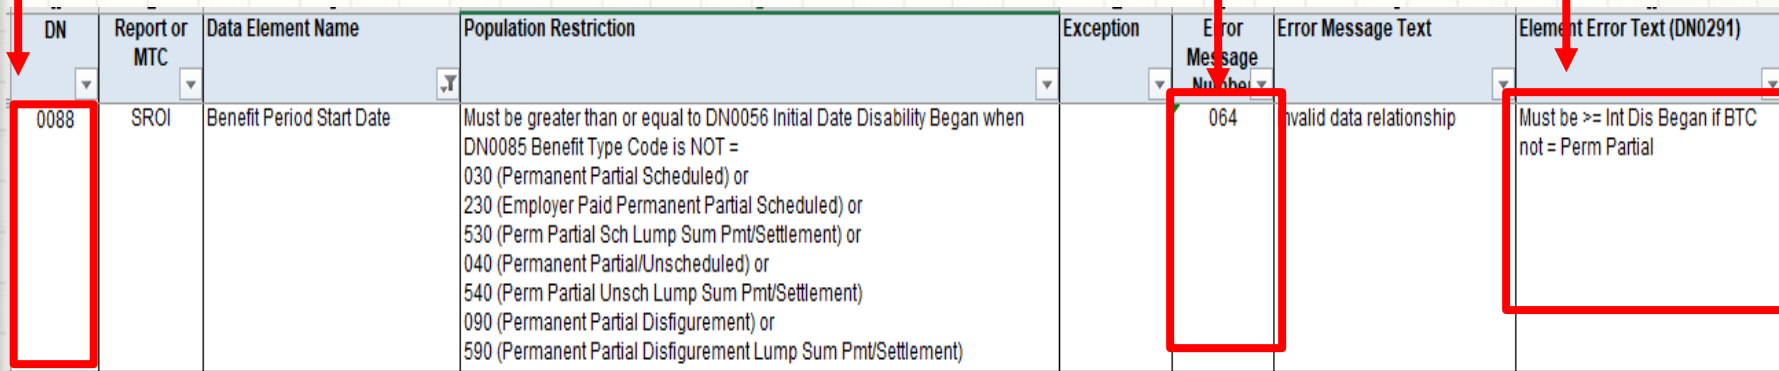

Another example: The Acknowledgement showed the following:

Element Number (DN) 0088 (Benefit Period Start Date)

Element Error Number 064 (Invalid Data Relationship)

Variable Segment Number: 02

Element Error Text: Must be >= Int Dis Began if BTC not = Perm Partial

DN	Report or MTC	Data Element Name	Population Restriction	Exception	Error Message Number	Error Message Text	Element Error Text (DN0291)
0088	SROI	Benefit Period Start Date	Must be greater than or equal to DN0056 Initial Date Disability Began when DN0085 Benefit Type Code is NOT = 030 (Permanent Partial Scheduled) or 230 (Employer Paid Permanent Partial Scheduled) or 530 (Perm Partial Sch Lump Sum Pmt/Settlement) or 040 (Permanent Partial/Unscheduled) or 540 (Perm Partial Unsch Lump Sum Pmt/Settlement) or 090 (Permanent Partial Disfigurement) or 590 (Permanent Partial Disfigurement Lump Sum Pmt/Settlement)		064	Invalid data relationship	Must be >= Int Dis Began if BTC not = Perm Partial

ALASKA'S SEQUENCING TABLE

(1) Consider MTC in Seq C or X - SROI MTC UR (Upon Request Grandfathered) ADOL SROI example, FROIs that follow

ADOL SROI Example for use of MTC UR (Upon Request (Grandfathered))

X (Do not consider) in Sequencing (Seq):

1. If the MTC is = UR Update report
2. If the MTC is not accepted in both R3' and R3.1
SROI MTC not accepted in both R3.0 and R3.1: AB, UI, BM, BW, MN, QT, SA so will be set to = X
3. AK SROI R3.0 MTC only that was not accepted in R3.0 : RE and P1-PJ so will be set to = X
4. If the MTC is a R3.1 MTC only and the MTC is not accepted in R3.1
AK SROI R3.1 MTC only that is not accepted in R3.1: AC, PX, SU so will be set to = X

C (Consider) in Sequencing for MTCs that are not set to X (Do not Consider).

Blue Shaded/Not Shaded

(3) FROI and SROI Sequencing Exception Edits

FROI and SROI Sequencing Exception Edits: This table is used to communicate sequencing exception edits that may be applied beyond a typical MTC to MTC edit however not down to the DN level. Alaska has placed a Y or N in the 'Edit Applied?' column if the 'Sequencing Exception Edit' will be applied.

Edit Applied? ST-Y/N	Edit ID	Sequencing Exception Edits Note: A Jurisdiction should contact the Systems Committee if additions or changes are needed.	DN0291 Element Error Text (Recommended) Note: A Jurisdiction may change the text. Recommend keeping the Edit ID as part of the text.
AK-N	A01	Only a FROI 01 Cancel is allowed to follow. Business Reason: Jurisdiction may have notified the Trading Partner to cancel the claim.	JUR requested this JCN to be cancelled (A01)
AK-Y	A02	FROI 01 Cancel is not allowed to follow. Business Reason: Jurisdiction may have notified the Trading Partner that the claim cannot be cancelled.	JUR will not allow this JCN to be cancelled (A02)
AK-N	A03	If MTC CO (Correction) is accepted, then for ANY MTC on file in TE (Transaction Accepted with Error) acknowledgment status, a MTC CO must be on file with a TA (Transaction Accepted) acknowledgment status before any other MTC will be accepted. Re: R3.1 Guide ERROR CORRECTION PROCESS GUIDELINES	TE ack on file, send CO to proceed(A03)
AK-Y	C01	If you submit a FROI UR(G) for a claim that is not a legacy claim for that insurer, then your incoming FROI will be rejected.	Case is not a legacy claim, FROI UR(G) not allowed (C01)
AK-Y	C02	If you submit a FROI-UR(G) on a legacy claim which has already had a FROI-UR (G) accepted for that insurer, then your incoming FROI UR(G) will be rejected.	Legacy claim already has FROI UR(G) (C02)
AK-N	C03	If you submit any FROI 00/04/AQ/AU on a legacy claim which has already had a FROI-UR (G) accepted for that insurer, then your incoming FROI UR (G) will be rejected.	Legacy claim needs a FROI UR(G) (C03)
AK-Y	F01	FROI 00 or 01 or 04 (if accepted by jurisdiction) allowed to follow if no previous same FROI accepted or accepted w/error	Prev FROI not TA or TE ack status (F01)
AK-Y	F02	FROI 02 allowed to follow if the Sender ID Group FEIN is same as Group FEIN for the previous Sender ID per latest report	Contact Juris for Group FEIN (F02)
AK-Y	F03	MTC's allowed to follow based upon the MTC that preceded the latest accepted FROI or SROI report on file. (excluding all 02, CO and Periodics)An intervening SROI Periodic (BM, BW, MN, QT, SA, AN), 02, CO allowed (if MTC valid in Jurisdiction).	Seq is based on prior MTC (F03)
AK-Y	F04	FROI AQ or FROI AU is allowed to follow if it is from different Claim Admin FEIN DNO187	Expect different Claim Admin FEIN on AQ/AU (F04)
AK-N	F05	FROI MTCs are allowed to follow if JCN (DN0005) is BLANK (to create new claim)	JCN expected to be blank (F05)
AK-Y	F06	FROI 00 is allowed to follow if no previous FROI 00 accepted or accepted w/error	FROI 00 on file (dup) with TA/TE ack status (F06)
AK-N	F07	SROI UR allowed if HD1 Sender ID = Sender ID FEIN: tbd Postal Code: tbd	SROI UR Not allowed per Sender (F07)
AK-N	F08	FROI Claim from Employee (JE) or Claim Other (JP) is allowed if HD1 Sender ID = JURISDICTION FEIN and Postal Code	No JE or JP is allowed (F08)
AK-Y	F09	FROI 01, 02 or CO is allowed if HD1 Sender ID = JURISDICTION FEIN and Postal Code and the latest report is FROI Claim from Employee (JE) or Claim Other (JP) or Legacy (JH)	No FROI 01 02 CO allowed after JE or JP (F09)
AK-N	F10	FROI or SROI UI is allowed to follow if no previous FROI or SROI UI accepted or accepted w/error	UI on file with TA/TE ack status (F10)
AK-Y	F11	Any FROI MTC can follow. Technical: Apply no sequencing edit when the latest FROI is FROI UR. FROI CO Exception (if applicable in jurisdiction): The FROI CO will only be accepted if a FROI UR on file is in TE ack status. If not, FROI CO will receive 063 error. Normal sequencing will apply to the MTC that follows the FROI UR. Business Note: FROI MTC that follows the FROI UR should reflect the next action needed on the claim(s) as determined by the trading partner sending the data.	Apply no seq edit when the latest FROI is FROI UR(F11)
AK-Y	F12	If the Last Submitted FROI MTC is in TE status and the incoming FROI from a different Claim Admin FEIN is FROI MTC AU or FROI MTC AQ, then allow the FROI MTC AU or FROI MTC AQ to be processed by not requiring the FROI CO (Bypass the MTC CO requirement because the prior Claim Administrator had the error on file and now the new Claim Administrator is taking over the claim and cannot resolve the error. Per IAIBC R3 Guide Error Correction Process in Section 4: Jurisdictions should not expect acquiring claim administrators to correct TEs from prior claim administrators (refer to Acquired Claims Processing).	FROI AQ AU mustBeFromDifferentClaimAdmin (F12)
AK-N	F13	For blue shaded MTC's: If the Legacy Claim (JH) is found and any blue shaded FROI or SROI MTC is submitted first other than a FROI unblue shaded MTC's return a TR acknowledgment with DN0002 MTC with Error 063 – Invalid event sequence.	Legacy Clm rcvd-send MTC UR FROI(F13)
AK-N	F14	For greyed MTC's: If the legacy claim (MTC JH) is NOT found and any greyed FROI or SROI MTC is submitted first other than a FROI ungreyed MTC's return a TR acknowledgment with DN0002 MTC with Error 063 – Invalid event sequence.	No Legacy rcvd-UR invalid-send diff FROI MTC(F14)
AK-N	F16	Legacy Claim (JH): If you Trigger FROI MTC UR and there is no Legacy Claim (JH) on file then the FROI UR is rejected.	NoLegacy rcvd-URinvalid-sendDiffFROI(MTC)(F16)
AK-Y	F17	JCN (DN0005) should be returned on acknowledgment if incoming FROI finds a match on a Claim From Employee (JE) or Claim Other (JP) or Legacy Claim (JH)	
AK-N	F18	MTC for Legacy Claim (MTC JH): If the claim (Any MTC for Legacy Claim as defined by state) is NOT found then the FROI UR is rejected.	No Legacy rcvd-UR invalid-send diff FROI MTC(F18)

(3) FROI and SROI Sequencing Exception Edits

The exception edits are found in the FROI or SROI Sequencing Exceptions column

< Consider MTC in Seq C or X(1)	If Last Accepted SROI MTC Is:	Last SROI MTC Description	FROI Sequencing Exception Edits (3)				FROI															
			F03	F08	F13	F16	Not shaded: MTC can follow with consideration of Sequencing Exception Edits. Blue Shaded: IAIABC defined MTC cannot follow. MTC Accepted for Seq: Y or N (2) See Sequencing Exception Edits (3) for edits concerning an unblue MTC

How do I get help?

Please send all questions to the Alaska EDI Support Team via email at ADOLEDI@ISO.COM.

If the question is specifically about something in this Information Session, please indicate “Info Session Question” in the subject line.

How do I get help?

If you feel you need further training on understanding the IAIABC R3.1 format, the IAIABC is hosting a Virtual Claims Release 3.1 training on March 23 and 24, 2021. You can find further details and registration at IAIABC.org under the Events & Education dropdown, then under EDI Training.

Virtual EDI Claims Release 3.1 Training

[← BACK TO EVENTS](#)
